DHA/EPA

(Docosahexaenoic acid / Eicosapentaenoic acid)

From Microalgae

PRODUCT OVERVIEW

Docosahexaenoic acid (DHA) and Eicosapentaenoic acid (EPA) are essential omega-3 fatty acids that play key roles in promoting brain, eye, cardiovascular, and overall health. DHA is a major component of the brain and retina, supporting cognitive function, visual development, and reducing inflammation, especially crucial during pregnancy and infancy. EPA, known for its potent anti-inflammatory properties, helps lower triglycerides, supports heart health, and may improve mental health by regulating immune responses. Both are widely used in dietary supplements, often together, and are incorporated into fortified foods and clinical nutrition products for overall well-being.

PRODUCT SPECIFICATIONS

- EPA 10% + DHA 40%
- Customization of specifications is available based on customer requirements.

PRODUCT APPLICATIONS

- Dietary Supplements
- Functional Foods

*These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent any disease.
*Our products will not be sold in countries or regions where patents are in effect.

Digital Version

MAIN EFFICACY

- Cognitive Function
- Visual Development
- Reducing Inflammation

OUR STRENGTHS

- Odorless (No Fishy Smell) and Resistant to Oxidation
- Free from Marine Heavy Metal Contamination
- Sustainability
